A one-day workshop on “CURRICULAR ASPECTS AND ACADEMIC REGULATIONS”

A one-day workshop on “Curricular Aspects and Academic Regulations” was inaugurated by Prof. K. Lal Kishore, Hon’ble Vice-chancellor, JNTUA Anantapur on 25-05-2013 at Sree Vidyanikethan Engineering College, Tirupati. Addressing the Principal’s and Senior Professors of Engineering Colleges in Chittoor District, he emphasized the need to bring about changes in curriculum of Engineering Programmes, so that Engineering Education in India can be on par with Western standards, as per the Washington Accord. He also felt that subjects on moral and ethical values shall be introduced in the Engineering Programmes to enable the students to evolve as good citizens. He suggested that the teachers should prepare preamble for every subject whenever changes are suggested and evaluate the final outcomes. He shared his experiences as a teacher and academic administrator to enthuse the Principals and Senior Professors to orient themselves to the changing global scenario.

Prof. T. Gopala Rao, Special Officer, SVET suggested teachers should motivate the students to read useful books in addition to their course books, so that they can have a broad view about the society in which they live. Reading habit among students shall be inculcated as a compelling need of the hour.

About 90 Principals and Senior Professors from Engineering Colleges in Chittoor District; Special Officer, Prof. T. Gopala Rao; Director, Prof. D.V.S. Bhagavanulu; Principal, Dr. P.C. Krishnamachary; Dean Academics, Prof. C. Subash and several other members of faculty participated in the workshop, which is the first of its kind to be organized as a prelude to the meetings of Boards of Studies scheduled to be held at JNTUA, Anantapur in June 2013.
